Q. Tell me about yourself? Tell me something about you? Introduce yourself?

Hi/Hello

Myself Aniket Kadam, I have completed my graduation from Maharashtra Institute of Technology Aurangabad.

I have total 2 years of experience in software testing, currently I am working in Infosys company Hinjewadi Pune as a Software test engineer.

I have good experience in manual as well as Automation testing.

In manual testing I have good understanding of customer requirements, as per customer requirements design test cases, then review test case, then execute that test cases and then send build wise status report to team leader.

At the time of Manual Testing I involved in different functional as well as non functional testing, Sanity testing, Regression testing and UAT Testing etc.

In Automation Testing I am using Selenium Web Driver with Java Language. In Java I have good knowledge of oops concepts.

I have good experience in Hybrid Framework means data driven with POM concepts. Also have good experience in Maven build management tool and testing and it's Annotations.

Also have good Knowledge in SQL Queries for that I am using Oracle database.

Also have knowledge of API testing and their Methods and Status codes.

That's all about me. Thank you!
